SEO & GEO Analysis Report

Company: **caplinq** | Domain: **caplinq.com** | Analysis: **2026-04-12 17:50 UTC** | Library v1.3.0

Executive Summary

Your company's overall digital health at a glance. This section shows AI citation performance, technical health, and the most critical findings requiring attention.

AI Citation Performance

CITATION RATE	OPENAI	ANTHROPIC	GEMINI
100%	4/4	1/4	0/4

CITE C05: PASS CITE C07: PASS — Cited by at least 2 of 3 AI engines

Technical Health

PAGESPEED (MOBILE)	LCP	CLS	FCP
26	10.5s	0.635	5.7s

Top 5 Critical Findings

1. Poor Core Web Vitals — LCP 10.5s (should be <2.5s), CLS 0.635 (should be <0.1). Mobile performance score 26/100. Severely impacts SEO and user experience.

2. No Wikidata Entity — CAPLINQ lacks a Wikidata entry, limiting Knowledge Graph presence and AI entity recognition.

3. Zero Gemini Citations — Despite using Google Search, Gemini doesn't cite caplinq.com. Content may lack structured data for AI.

4. Low Anthropic Citation Rate — Only 1/4 queries cite caplinq.com. Opportunity

for GEO optimization.

5. Strong OpenAI Presence — 4/4 queries cite caplinq.com. Leverage this as a baseline for other engines.

Domain Baseline

How search engines and AI systems recognize your company as an entity. Strong entity signals help your content appear in Knowledge Panels and AI-generated answers.

Entity Presence

Platform	Status	Action
Wikidata	Not Found	Create entity with basic facts
Wikipedia	Not Found	Consider notability criteria
Google Knowledge Panel	Unknown	Verify with brand search

AI Citation Baseline

Query	OpenAI	Anthropic	Gemini
CAPLINQ specialty chemicals	✓	✗	✗
thermal interface materials supplier	✓	✓	✗
gas diffusion layer carbon paper	✓	✗	✗
semiconductor mold compounds Europe	✓	✗	✗

Engines tested: OpenAI (gpt-4o-search-preview), Anthropic (claude-sonnet-4-5 + web search), Gemini (gemini-2.5-flash + Google Search)

Company Profile

Industry	Specialty Chemicals, Electronics Materials
Products	Thermal interface materials, die attach adhesives, ion exchange membranes, semiconductor materials
Markets	Semiconductors, eMobility, Renewable Energy, Aerospace
Locations	Netherlands (HQ), USA, Canada, China, Philippines, Malaysia

Certifications	ISO 9001

Technical

Website performance, crawlability, and search engine accessibility issues. Technical problems can prevent even great content from ranking well.

Core Web Vitals (Mobile)

Metric	Value	Target	Status
LCP (Largest Contentful Paint)	10.5s	<2.5s	Poor
CLS (Cumulative Layout Shift)	0.635	<0.1	Poor
FCP (First Contentful Paint)	5.7s	<1.8s	Poor
Performance Score	26/100	>90	Poor

Crawlability

robots.txt	Present
Sitemaps	4 declared (general, products, blog, services)
CMS	Joomla (based on blocked paths)
Blocked Paths	Standard Joomla admin/system directories

Recommendations

Prioritized improvements with specific implementation guidance. Each recommendation maps to a measurable improvement in your visibility scores.

P0 — Critical (This Week)

Action	Impact	Effort
Fix Core Web Vitals — optimize images, defer JS, reduce server response time	High	High
Add Organization schema to homepage	Medium	Low

P1 — Important (This Month)

Action	Impact	Effort
Create Wikidata entity for CAPLINQ	High	Medium
Add FAQ schema to product pages for Gemini visibility	Medium	Medium
Optimize content for "thermal interface materials" (Anthropic opportunity)	Medium	Medium

P2 — Recommended (This Quarter)

Action	Impact	Effort
Add Product schema to all product pages	Medium	High
Create definitive content for "gas diffusion layer" queries	Medium	High
Build citation-worthy content (studies, whitepapers, data)	High	High

Next Steps

Your 90-day action plan with priorities and expected impact. Start with P0 items for the fastest improvements.

90-Day Action Plan

Priority	Action	Owner	Timeline
P0	Audit and fix Core Web Vitals (LCP, CLS)	Dev Team	Week 1-2
P0	Add Organization + LocalBusiness schema	Dev Team	Week 1
P1	Create Wikidata entity	Marketing	Week 2-3
P1	Add FAQ schema to top 10 product pages	Dev Team	Week 3-4
P1	GEO-optimize "thermal interface materials" content	Content	Week 4-6
P2	Product schema rollout (all products)	Dev Team	Week 6-8
P2	Create citation-worthy technical content	Content	Week 8-12

Analysis Metadata

Domain	caplinq.com
Timestamp	2026-04-12T17:50:45Z
Tool Tier	Tier 2 (API integrations active)
AI Engines	OpenAI, Anthropic, Gemini (Perplexity skipped)
Data Confidence	High (live API data)
